Duratank

At Duratank, we believe in harnessing Australia's most precious resource and do so in an innovative and exciting way. Challenging existing concepts and conceptualising cutting-edge designs to be stronger; more durable and overall to survive the harsh Outback Australian Climate in every tank we make.

Duratank is the Northern Territory's largest Poly-Tank Manufacturer. Owned and operated by Territorians, for Territorians, and part of a Northern Territory business which has been operating since 1985.

Duratank was founded on the belief that people and businesses residing in the Northern Territory and the Top End of Australia deserve products that can withstand the harsh environment we live in. Hence, Duratank has developed our range of tanks and products designed and built to the highest of standards and for unrivalled quality.

As a two-generation company, we offer our customers a business that has a young, innovative, and energetic drive, combined with long-term and proven business knowledge. Our business acumen means we can ensure our products are delivered on-time and to the superior Duratank standard.

The Duratank Difference

Duratank locally manufactures the Top End's Biggest, Toughest Tanks, made intentionally for harsh Australian outback conditions. Loyal to our Top End home, we have pledged to ensure that our tanks are made to the highest of standards and with unrivalled quality.

Duratank is the first and only Poly-Tank Manufacturer in the Northern Territory to be Australian Quality Certified in accordance with AS4766. This means our tanks and products undergo stringent quality testing and inspection, ensuring that your tank is a Duratank.

Here at Duratank we strive to provide the Top End's Biggest, Toughest Tanks and have designed our products from the bottom to the very top with this statement in mind. Our products offer the largest volumes in the Northern Territory, allowing for larger and longer storage. Not only are our products the largest in the Northern Territory, but our innovative ribbed walls also provide extra strength along the length of your tank to guarantee that your precious resource is safe, secure, and free from the risk of your tank splitting. Our geometric lids are fully self-supporting and are low profile, this allows for the size to be where it matters the most: holding your resource!

Duratank believes in the Top End of Australia and the people that live here. We believe in providing opportunities, as well as unrivalled services to this magnificent area of the country. We have invested in state-of-the-art machinery. This makes our products not just bigger and stronger than other products on the market, but also able to be produced more efficiently and productively. We can provide our customers with their Duratank in no time at all.
